

9 week

WORKSHOP OUTLINE

WORKSHOP OUTLINE

Week One: Sensory Board

A sensory board is made up of different textures and shapes in shades of black and white. Black and White because it is most engaging for baby due to the high contrast. This is an adapted craft following the Montessori Method of education.

Week Two: Hot Air Balloon Mobile

This beautiful mobile is sure to brighten up any space. Use different coloured paper to make and create a unique peice to hang over your baby's crib or play area.

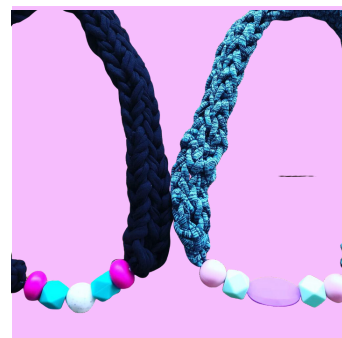

Week Three: Wool Woven Pot

Learn a super cool technique involving wool, wool roving and a hot glue gun. We will make tassels and build them around the base of a small ceramic pot that will liven up any space. Use for a cute little succulent or store craft supplies inside.

Week Four: Teething Necklace

Did you know you can recycle t-shirts into workable yarn? Learn how to finger-knit some funky fabric yarn into a durable necklace, bracelet or headband!

Week Five: Tassel/ Pom Pom Hanging

Tassels and Pom poms offer babies texture and depth that can help them to develop focus and concentration. You can decide on your colour scheme and mobile set-up to suit your taste.

Week Six: Farmyard Finger Puppets

Stitch your own set of cute farm animal finger puppets to enjoy with your child. All designs come pre-cut so you can easily complete the set (even with a babe in arms). Have no fear from home-economics classes past, you will succeed with these and feel super proud when they are complete!

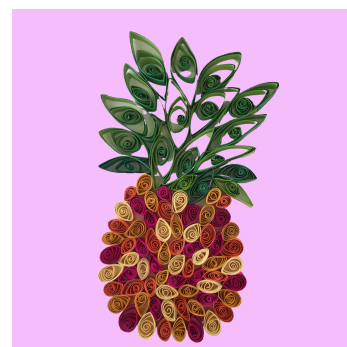

Week Seven: Library Bag

We've phased out plastic shopping bags so let's make our own gorgeous designs to be proud of! You will have fun designing and decorating your own canvas tote. These totes make a perfect library or swimming bag...or just a cute little bag for Mumma!

Week Eight: Paper Quill Nursery Print

This is a surprisingly easy technique of rolling paper strips produces really cool 3D artwork for your walls. Make this for bub (or yourself)! Choose from a template or draw your own design on heavy cardstock before rolling strips of coloured paper into different shapes to glue onto your design. This workshop does take a little patience so I recommend starting small in order to complete a design during the workshop or beginning something BIG to finish in your own time.

Week Nine: Sensory Bottles

Create mini-worlds for your little one to discover...and all in a handy shake bottle. Choose three different themes to create inside a bottle. Including but not limited to; glitter gel, crazy buttons and i-spy alphabet. These crafty little sensory bottles allow your baby time to explore the contents whilst also developing motor skills through grasping, rolling and shaking. If you have a toddler or child who is eager to help, this is a great workshop to do together.

A LITTLE ABOUT THE FOUNDER...

I'm Carlie Daly and I am the founder of Mumma Got Skills.

I am a qualified teacher, Arts specialist and Mum. I have worked as a workshop facilitator for over 10 years. I currently run craft workshops for Mums and Bubs and Wine and Craft workshops.

I am passionate about delivering quality experiences to promote positive post-natal wellbeing and give back my profits by providing free workshops for marginalised mothers.

It is my mission to find positive ways to engage mums at their most vulnerable moments.

A LITTLE ABOUT MGS...

Mumma Got Skills is a social enterprise founded in July 2018. It exists to foster positive spaces for creation and solidarity through motherhood.

Through craft workshops, new mums are given a moment to clear their minds as they set to complete a creative task in a relaxed and supportive environment.

The giveback from paid workshops is the delivery of free workshops to marginalised mothers in pockets of the community that need it most.

Over the past 20 months, MGS has delivered over 150 workshops, spreading the magic of craft to over 600 women (and children) in QLD.
